Session 1

Timothy Robertson

Assistant Scientist, Johns Hopkins
Bloomberg School of Public Health

Timothy is a faculty member in the Department of International Health at the Johns Hopkins Bloomberg School of Public Health. He works as part of the team that maintains the Lives Saved Tool, a model for estimating changes in child and maternal mortality rates, and he develops other modelling tools to assist governments and NGOs more effectively design and evaluate their health programs. His research centres on maternal, newborn, and child health, community-based health and nutrition programs, human resources for health, and trends in mHealth and tools for data use. He is an instructor for graduate courses on NGO management and health workforce modelling.
